CARLOS MARIO GONZALEZ

FULL-STACK WEB DEVELOPER

ABOUT ME

Beyond everything that is always said, the truth is that I have a great passion for programming. Every day, my desire is to learn more, improve myself and face increasingly complex challenges. Furthermore, I consider myself a dedicated person, capable of solving problems efficiently, and I enjoy working in a team as well as alone.

EDUCATION

Secondary Study

Colegio Tolimense

Ibague - Colombia - 2015

Tertiary Training in Software Development:

Programming Courses: I took various specialized courses in programming, covering technologies such as React, Next.js, Nest.js, Node.js, among others.

Self-taught: Through a self-taught approach, I have deepened my knowledge in software development, exploring new technologies and acquiring practical skills in personal projects.

English level: A2

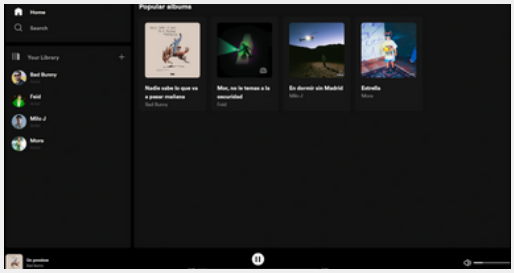
PROJECTS

Chat with PDF

Next, Node, Tailwind, Cloudinary y OpenAi - 2024

This project allows you to simply drag your PDF onto the page and, within seconds, ask questions related to its content.

Spotify clone



React, Node, Tailwind, Postgresql - 2023

This project is different from the others because I developed it with Astro. I made an integration with React; As it is a very reactive and interactive application, I needed a global state, and for that I used Zustand, which I consider the best currently. I also created a database to get the information, and connected and managed it with Prisma.js.

Technologies:

React, Next, Node, Postgres, Mongo, HTML, CSS, JavaScript, TypeScript, Vercel, Tailwind, Nest y mas.

If you want to see more projects, you can visit my website.
